

## NO SPACE IS MORE PERSONAL THAN THE PLACE CALLED HOME.

Some people know instinctively that home is more than a physical address. For them, home is the place that reflects their passions, embraces their family and friends, and provides a comfortable backdrop for a life well lived.

Inspired by the landscape that surrounds the home as well as by the individual personalities who reside there, Neal Prince & Partners collaborates with clients to create a home environment that is attuned to their own unique needs.

We create homes that are shaped for – and by – the people who live in them.
